Apparently neither Mr. Truman nor the Democratic whips in congress mean to pay any attention whatsoever to Southern sentiment and are going to risk everything in a single throw of the dice to meet what they believe the Northern factory worker is thinking about.

They certainly aren't—and it is likely that the next election will prove it. . . a political disaster which the Democratic high command has been steadily inviting down upon itself, climaxed by last night's jawbonecracking on the radio.

Last night's debate hinged on the issue: The Democratic spokesclaimed they were going to give tax relief to the small tax-payers by granting an additional \$40 exemption per person and levying a special excess profits tax against large corporations so that the total tax income would main unchanged; against which the Republicans set up a plan to reduce the total tax bill on a graduated scale for all.

would help the poor, but the Republican bill would help the rich. The Républicans countered with the stalement that all taxes, whether the rich of the claim with Missouri Pageinst rich on process with the control of the results of against rich or poor, ultimately are passed on to the consumer.

And isn't that so? Not that any individual or corporation our own area is affected by the threatened Democratic excess profits tax, for this wouldn't apply against corporations whose net income is below \$50,000 a year. But it jars your commons sense to hear someone making the demagner of the Congressional medal of Henor was held without ball today charged with apply are confident of victory."

The gogic plea that you can keep war-tisle taxation at the peak and still

let the common people escape paytheir share of it. The trouble with the country now is that it has a prohibitive cost of living simply because the cumulative effect of all taxation has been added onto the consumer's bill—and any tax proreducing the total amount of all taxes is just so much nonsense.

U.S. Decision to Reopen Mellaha in North Africa Stirs Up Soviet Press

By DEWITT MACKENZIE AP Foreign Affairs Analyst

Washington's decision to reoper washington's decision to reopen the war-time American articled of Mellaha, near Tripoli in North Africa, has surred the wrath of the Stwicts Press which (always inspired) charged that this is further evidence of Uncle Sam's Imperialistic ambition to rule the world.

The necusers choose not to recall that Russia has made an open secret of her desire to become a Mediterranean power. Indeed, she with a mandate over the Italian colony of Tripolithic and is demanding that Turkey give her a hand in the control of the strategic Pardanelles which provide the So-viet union access to the Mediter-ranean from the Black Sea.

Well. America has no imperial istic ambitions, but a couple of world wars, in which she has been compelled to play a leading role, have thrust world wide interests and chligaions upon her. While America plans to use Mellaha merely as a way station, it is interesting to note that it does command the Central and Easetrn Mediterranean, Within a radius of 900 miles lie the capitals of Haly, Yugoslavia Albania, Bulgaria and Greece as well as Western Turkey. So on the whole it perhaps isn't unnatural that some other countries should view America's possession of Mellaha with keen interest. And that may be all to the good in the interests of peace.

Gold Heiress Seeks Annulment of Marriage

New York, Jan. 20—(A)—Nancy Oakes De Marigny, 23-year-old heiress to the gold mine fortune of her slain father. Sir Harry Oakes, has brought suit to annul her marriage to Count Alfred De Marigny, it was disclosed yesterday.

The action, filed several weeks ago, became publicly known when State Supreme Court Justice Benedict D. Dineen signed an order permitting notice to be served on De Marigny by publication.

De Marigny, 41, was acquitted in 1943 of bludgeoning Oakes to death at Nassau in the Bahamas. Mrs. De Marigny expressed belief in his innocence throughout the long trial. De Marigny was reported living
